

KSDF 2026

2nd WOMEN'S HEALTH SOCIETIES
FEDERATION CONGRESS

APRIL 22-26, 2026
Rixos Sungate, Antalya

APRIL 22, 2026, WEDNESDAY

HALL A

13:00-14:00 **Imaging in Gynecology**
Course Director: **Ayşe Dayhan Altı**
Session Chairs: **Ayşe Dayhan Altı, Ayşe Luksioğlu**

13:00-13:20 Enhancing 2D and 3D Ultrasound Image Quality: Secrets of the Masters
Ayşe Luksioğlu

13:20-13:40 Assessment of the Uterine Cavity and Fallopian Tubes from an AIY Perspective
Arzu Luksioğlu

13:40-14:00 Interactive Cases: Diagnostic and Therapeutic Ultrasonics in Congenital Uterine Anomalies
Ayşe Luksioğlu, Arzu Luksioğlu

14:00-14:30 **KAİVE ARASI**
Ultrasound Class: Overwrite Calaycı

14:30-15:00 **Session Chair: Özgür Kalkan, Erhan Şimşek**

14:30-14:40 Ultrasound Diagnosis of Fibroids: How to Define and Map Them?
Özgür Kalkan

14:40-15:00 Diagnosis of Adenomyosis and Challenges in Ultrasonography
Şimşek Erhan

15:00-15:30 Interactive Cases: Diagnostic and Therapeutic Ultrasonics in Adenomyosis and Fibroids
Alper Aktan

15:30-15:40 **KAİVE ARASI**
Ultrasound Class: Overwrite Calaycı

15:40-16:00 **Session Chair: H. Feri Kalkan, Mehmet Ali Vardar**

15:40-16:00 Use of IDEA "Simple Rules" to Differentiate Benign and Malignant Adrenal Phases & Metastatic Cases
Hemeliha Çiçek

16:00-16:30 Introduction to AI-MED and 0-RADS Models for Predicting Ovarian Pathology
Sahin Toprak

16:30-16:40 Interactive Cases: Application of AI-MED and 0-RADS Models
Doğan Bektaşoğlu

16:40-17:00 Closing Session and Certification
Ayşe Dayhan Altı

LEARNING OBJECTIVES

- To understand technical parameters affecting image quality in 2D and 3D ultrasonography
- To learn the ultrasonographic evaluation of the uterine cavity and fallopian tubes from an AIY perspective
- To apply current classification in the ultrasonographic diagnosis of congenital uterine anomalies
- To distinguish the ultrasonographic diagnostic criteria of adenomyosis
- To describe the ultrasonographic features of fibroids using standardized terminology
- To effectively use the IDEA "Simple Rules" approach in the differential diagnosis of benign and malignant adrenal masses
- To recognize the importance of an evidence-based, standardized, and patient-centered approach in gynecologic ultrasonography

HALL B / 13:00-18:00

Obstetric Ultrasonography Course
Course Director: **Elif Çetinkaya Demir**
Session Chair: **Semret Nispet, Nilayla Elmalı**

First Trimester: Covering Ultrasound: Standard Planes, Measurements and Quality Criteria
Can Sarıal

First Trimester: Fetal Anatomy: Pathologies That They Appear "Normal"
Nilay Çelikkaya

Diagnosis of Common Scar Pregnancy: Early Differential Diagnosis and Management Algorithms
Emel Dürü Doğan

KAİVE ARASI

Session Chair: **Elif Çetinkaya Demir, Emel Dürü Doğan**

Second Trimester: Anatomy Scan: Essential Planes and Mandatory Views
Semret Nispet

Second Trimester: Anatomy Scan: Extended Evaluation and Gray Zones
Nilay Çetinkaya Demir

Conical Assessment: In Whom, When, and What to be True About?
Muhammed Hamit Bektaşoğlu

KAİVE ARASI

Session Chair: **Sahin Toprak, Mehmet Şimşek**

Ultrasonographic Evaluation of Amniotic Fluid and Placenta: Normal or High Risk?
Edem Çelikkaya

Placenta Access Spectrum: Strengths and Limitations of Prenatal Ultrasonographic Diagnosis
Nilayla Çetinkaya Demir

LEARNING OBJECTIVES

- To identify the indications for intraperitoneal hormone therapy (IMHT) in accordance with current guidelines and determine appropriate patient selection criteria
- To explain evidence-based approaches regarding the timing of initiation and duration of IMHT and adapt them to clinical practice
- To learn the types, characteristics, and indications of estrogen, progesterone, and other hormonal agents used in menopause management
- To develop an individualized treatment plan by defining the advantages and disadvantages of different routes of hormone administration (oral, transdermal, vaginal, etc.)
- To discuss lifestyle management during menopause and the role and effects of IMHT in light of current evidence
- To explain non-hormonal treatment options (behavioral and lifestyle approaches) in appropriate patient groups
- To recognize the importance of an individualized, safe, and evidence-based approach to menopause management and translate it into daily clinical practice
- To systematically and comprehensively obtain standard planes during second-trimester fetal anatomy screening
- To differentiate early- and late-onset ultrasonographic findings of fetal anomalies
- To perform accurate cervical length measurement and interpret findings in preterm birth risk assessment
- To describe the ultrasonographic features of fibroids using standardized terminology
- To identify the critical fetal anatomical structures that must be assessed in the first trimester
- To learn the ultrasonographic diagnostic criteria of common scar pregnancy, perform differential diagnosis, and plan appropriate clinical management
- To systematically and comprehensively obtain standard planes during second-trimester fetal anatomy screening
- To differentiate early- and late-onset ultrasonographic findings of fetal anomalies
- To perform accurate cervical length measurement and interpret findings in preterm birth risk assessment
- To describe the ultrasonographic features of fibroids using standardized terminology
- To identify the critical fetal anatomical structures that must be assessed in the first trimester
- To learn the ultrasonographic diagnostic criteria of common scar pregnancy, perform differential diagnosis, and plan appropriate clinical management

HALL C / 13:00-18:00

PCOS Session
Course Director: **Fatih Durmuşoğlu**
Session Chair: **Fatih Durmuşoğlu, ERF Akdoğan**

Indications for Menopausal Hormone Therapy (MHT)
Ayşe Çiftçi

Who Should Receive MHT?
Kemal Özkan

When to Initiate and How Long to Continue?
Tuba Ayten Kılıçkapan

KAİVE ARASI

Session Chair: **Fatih Durmuşoğlu, İpek Özyiğit**

Which Hormone?
ERF Akdoğan

Which Protocol?
Hakan Şeyhanlı

Which Route of Administration?
Fatih Durmuşoğlu

KAİVE ARASI

Session Chair: **Hakan Şeyhanlı, Tuba Ayten Kılıçkapan**

Benefit and OLP: Agents
Özge Aydın

Non-Hormonal Treatment Options
Fatih Akdoğan

Biomedical and Compound Biomedical Concepts
İpek Özyiğit

LEARNING OBJECTIVES

- To define the indications for intraperitoneal hormone therapy (IMHT) in accordance with current guidelines and determine appropriate patient selection criteria
- To explain evidence-based approaches regarding the timing of initiation and duration of IMHT and adapt them to clinical practice
- To learn the types, characteristics, and indications of estrogen, progesterone, and other hormonal agents used in menopause management
- To develop an individualized treatment plan by defining the advantages and disadvantages of different routes of hormone administration (oral, transdermal, vaginal, etc.)
- To discuss lifestyle management during menopause and the role and effects of IMHT in light of current evidence
- To explain non-hormonal treatment options (behavioral and lifestyle approaches) in appropriate patient groups
- To recognize the importance of an individualized, safe, and evidence-based approach to menopause management and translate it into daily clinical practice
- To understand the relationship between IMHT and Cervical Cancer, the Immune System, and HPV Clearance
- To analyze lifestyle management during menopause and the role and effects of IMHT in light of current evidence
- To explain non-hormonal treatment options (behavioral and lifestyle approaches) in appropriate patient groups
- To recognize the importance of an individualized, safe, and evidence-based approach to menopause management and translate it into daily clinical practice
- To understand the relationship between IMHT and Cervical Cancer, the Immune System, and HPV Clearance
- To analyze lifestyle management during menopause and the role and effects of IMHT in light of current evidence
- To explain non-hormonal treatment options (behavioral and lifestyle approaches) in appropriate patient groups
- To recognize the importance of an individualized, safe, and evidence-based approach to menopause management and translate it into daily clinical practice

HALL D

Diagnosis and Management of HPV-Related Conditions
Course Director: **H. Feri Kalkan**
Session Chair: **H. Feri Kalkan, Nilayla Elmalı**

13:00-13:20 HPV Infection: Natural History and Clinical Significance
Doğan Bektaşoğlu

13:20-13:40 Current Approaches in Cervical Cancer Screening
Alper Bery Çiftçi

13:40-14:00 Approach to the HPV-Positive Patient: What Should Be the First Step?
Doğan Bektaşoğlu

KAİVE ARASI

Session Chair: **Mehmet Çelik, Servet Doğan**

14:00-14:40 Fundamentals of Colposcopy: When and How?
Mehmet Çelik

14:40-15:00 Management of CIN Lesions
Doğan Bektaşoğlu

15:00-15:30 Post-Treatment Follow-up and Risk of Recurrence
Sahin Toprak Şimşek

KAİVE ARASI

Session Chair: **Sahin Toprak, Sahin Toprak Şimşek**

15:40-16:00 HPV and Special Patient Groups
Alper Bery Çiftçi

16:00-16:30 HPV Vaccination: Who and When?
Mehmet Çelik

16:30-16:40 Common Pitfalls and Challenging Questions in Daily Practice
Doğan Bektaşoğlu, Servet Doğan, Erhan Şimşek

LEARNING OBJECTIVES

- HPV Types (High-Risk, Low-Risk) and the Concept of Persistent Infection
- The Relationship Between HPV and Cervical Cancer, the Immune System, and HPV Clearance
- Cytology or HPV Testing/Primary HPV Screening: Co-testing, and Triage Strategies
- Indications for Colposcopy, Transformation Zone Types, and Biopsy Strategies
- CIN 1-2-3: Surveillance or Treatment? Indications for Excision
- LEEP vs. Excisional: When to Choose What?
- Post-Treatment HPV Testing, Contraception, and Management of Persistent HPV
- HPV and CIN in Pregnancy: HPV Positivity in Postmenopausal Patients
- Innovative Management Plans, Risk Factors, and Couple-Based Approaches
- Prophylactic Vaccines and Post-Vaccination and Post-Treatment Strategies
- Utereroscopy: Colposcopy, Decontamination, and Prevention of Misdiagnosis to Patients

HALL E / 13:00-18:00

WNTES
Course Director: **Kemal Çelikkaya**
Session Chair: **Arzu Kaya, İzzet Bektaşoğlu**

WNTES Surgery: Introduction and Fundamental Principles
Bahadır Aksoy

WNTES Hysterectomy
Doğan Bektaşoğlu

Adrenal Surgery and WNTES
Kemal Nur Çelikkaya

KAİVE ARASI

Session Chair: **Doğan Bektaşoğlu, Süleyman Doğan**

WNTES in Emergency Gynecologic Cases
Doğan Bektaşoğlu

WNTES: Laparoscopic Surgery Technique
Doğan Bektaşoğlu

WNTES: Ultrasound-Guided Ligament Plication and Sacrocolpopexy
Süleyman Doğan

KAİVE ARASI

Session Chair: **Sahin Toprak, Süleyman Doğan**

WNTES in Complex Cases
Kemal Çelikkaya

Role of WNTES in Gynecologic Oncology Surgery
Doğan Bektaşoğlu

WNTES: Assistance and Management of Complications
Bahadır Aksoy

LEARNING OBJECTIVES

- To define the basic principles, indications, and patient selection criteria for WNTES surgery
- To evaluate the feasibility, advantages, and limitations of the WNTES approach in emergency gynecologic cases
- To identify fundamental surgical steps of WNTES lateral suspension, uterine ligament plication, and sacrocolpopexy procedures
- To analyze technical strategies and decision-making processes for the use of WNTES in complex gynecologic cases
- To identify potential intraoperative and postoperative complications associated with WNTES surgery
- To comprehensively evaluate the advantages and limitations of WNTES within the context of minimally invasive surgery and other surgical approaches
- To recognize the importance of a standardized, safe, and patient-centered surgical approach in WNTES applications and integrate it into clinical practice
- To understand the relationship between WNTES and Cervical Cancer, the Immune System, and HPV Clearance
- To analyze lifestyle management during menopause and the role and effects of IMHT in light of current evidence
- To explain non-hormonal treatment options (behavioral and lifestyle approaches) in appropriate patient groups
- To recognize the importance of an individualized, safe, and evidence-based approach to menopause management and translate it into daily clinical practice
- To understand the relationship between IMHT and Cervical Cancer, the Immune System, and HPV Clearance
- To analyze lifestyle management during menopause and the role and effects of IMHT in light of current evidence
- To explain non-hormonal treatment options (behavioral and lifestyle approaches) in appropriate patient groups
- To recognize the importance of an individualized, safe, and evidence-based approach to menopause management and translate it into daily clinical practice

HALL F / 13:00-18:00

Functional and Aesthetic Gynecology Course
Course Director: **Özhan Özkan**
Session Chair: **Özhan Özkan**

A Comprehensive Introduction to Integrative Gynecologic and Functional Gynecology and Learning Objectives of the Day
Özhan Özkan

Functional Pelvic Anatomy: Structural, Muscular and Neurovascular Landmarks Guiding Aesthetic and Reconstructive Procedures
Özhan Özkan

Aesthetic and Functional Considerations: Clinical Assessment, Historical Journey and Patient-Centered Design Principles
Mustafa Aydın

KAİVE ARASI

Session Chair: **Sahin Toprak**

Reconstructive Surgical Techniques: Edge, Wedge and Peritoneal Approaches for Functional and Cosmetic Optimization
Sahin Toprak

Labiaplasty and Clitoral Hood Procedures: Surgical Techniques, Indications, and Management of Aesthetic and Functional Complications
Mustafa Aydın

KAİVE ARASI

Energy-Based Technologies in Gynecology: Clinical Indications, Mechanisms and Evidence-Based Outcomes in Laser and RF Applications
Hülya Bektaşoğlu

KAİVE ARASI

Session Chair: **Özhan Özkan, Sahin Toprak**

Regenerative and Equivocal Therapies: Fat Grafting, Platelet-Rich Plasma and Hyaluronic Acid Fillers for Tissue Quality Enhancement
Doğan Bektaşoğlu

Combination Approaches: Synergistic Use of Surgical Energy-Based and Regenerative Modalities for Optimal Pelvic Restoration
Caner Kaya

Complication Management and Revision Strategies
Sahin Toprak

Closing Session: Certification and Future Perspectives in Functional and Aesthetic Gynecology
Özhan Özkan

LEARNING OBJECTIVES

- To identify pelvic anatomical structures guiding aesthetic and reconstructive procedures (structural, musculoskeletal, and neurovascular landmarks)
- To perform a clinical assessment that integrates functional and aesthetic requirements, based on patient-centered principles and anatomical harmony
- To explain the indications, fundamental surgical steps, and areas of application of reconstructive surgical techniques such as edge, wedge, and peritoneal
- To evaluate surgical techniques, patient selection, and management of aesthetic and functional complications in labia majora and clitoral hood procedures
- To explain the mechanisms of action, clinical indications, and evidence-based outcomes of energy-based technologies such as laser and radiofrequency
- To discuss the role of regenerative and rejuvenative therapies (fat grafting, PRP, hyaluronic acid fillers) in tissue quality and pelvic restoration
- To identify potential complications in functional and aesthetic gynecology and apply prevention, management, and revision strategies
- To integrate patient safety, ethical principles, and evidence-based medicine into functional and aesthetic gynecology practice
- To discuss future directions and areas of professional development in functional and aesthetic gynecology

The course will be conducted in Turkish and English. Simultaneous translation will not be provided.

HALL G

Labor and Delivery Management Course
Course Director: **Ferhan Kayaalp**

Safe "Labor Monitoring"
Intrapartum Ultrasonography
Eren Aytemir

Real-time Delivery
Eren Aytemir

Next-Generation Partograph
Arzu İzzet Bektaşoğlu

KAİVE ARASI

16:30-16:40 **"Ideal" Birth?**

16:40-17:00 How Can Birth Be Idealized? Without Sutures... Painless...
Ferhan Kayaalp

17:00-17:30 The Concept of Birth: Continuous Support
Mehmet Çelik

17:30-18:00 Epidural/Spinal Application... Repair...
Sahin Toprak

KAİVE ARASI

18:00-18:30 **"Water Birth" in All Its Reality?**

Water Birth Pains
Ferhan Kayaalp, Hakan Şimşek

LEARNING OBJECTIVES

- To be able to identify the instruments and energy systems used in hysterectomy and to select appropriate equipment based on the clinical scenario
- To be able to explain the fundamental technical principles of diagnostic and operative hysterectomy, and to correctly perform uterine cavity entry, dissection management, and energy optimization
- To be able to define the basic steps of pelvic, subcutaneous myoma, uterine rupture, and laparoscopic surgery using a microscope, and to perform appropriate patient selection and surgical planning
- To be able to explain hysteroscopic advanced techniques and evaluate medical and mechanical strategies to reduce recurrence
- To be able to select mechanical hysterectomy methods (e.g., rollers, bipolar systems, office hysterectomy techniques) with appropriate indications, and to comprehensively explain their advantages and disadvantages versus menoscopic methods
- To be able to recognize early complications related to hysterectomy (e.g., perforation, fluid overload, bleeding) and to apply prevention and management algorithms
- To learn the positive and negative effects of practices such as positioning, perineal massage, aromatherapy, and hand pressure on labor
- To emphasize epidural practices and the conditions required for achieving a birth without suturing
- To discuss the effectiveness of the midwife in labor monitoring and the characteristics of the birth team
- To discuss the optimal timing of epidural and the ideal technique for epidural injection
- To scientifically compare conventional and water birth approaches and emphasize the advantages and disadvantages of water birth
- To learn appropriate candidate selection, process management, preparation of the birth environment, and management of potential complications in water birth
- To aim to incorporate water birth into clinical practice through hands-on training at the bedside

HALL H / 13:00-18:00

Hysterectomy Course
Course Director: **Özhan Özkan**

Introduction and Basic Techniques in Hysterectomy
Özhan Özkan

Operative Hysterectomy: Use of the Resectoscope, Polyp, Myoma, Myometrium, System (with video demonstration)
Doğan Bektaşoğlu

Medical Tissue Removal in Hysterectomy: Polyp, Myoma, Uterine Rupture
Doğan Bektaşoğlu

Other Application Areas of Mechanical Hysterectomy: Prevention and Management of Complications in Hysterectomy
Özhan Özkan

KAİVE ARASI

Hands-on Training on Models and Simulators
Instructors: **Özhan Özkan, Doğan Bektaşoğlu, İzzet Bektaşoğlu, İzzet Bektaşoğlu**

KAİVE ARASI

LEARNING OBJECTIVES

To be able to identify the instruments and energy systems used in hysterectomy and to select appropriate equipment based on the clinical scenario

To be able to explain the fundamental technical principles of diagnostic and operative hysterectomy, and to correctly perform uterine cavity entry, dissection management, and energy optimization

To be able to define the basic steps of pelvic, subcutaneous myoma, uterine rupture, and laparoscopic surgery using a microscope, and to perform appropriate patient selection and surgical planning

To be able to explain hysteroscopic advanced techniques and evaluate medical and mechanical strategies to reduce recurrence

To be able to select mechanical hysterectomy methods (e.g., rollers, bipolar systems, office hysterectomy techniques) with appropriate indications, and to comprehensively explain their advantages and disadvantages versus menoscopic methods

To be able to recognize early complications related to hysterectomy (e.g., perforation, fluid overload, bleeding) and to apply prevention and management algorithms

To learn the positive and negative effects of practices such as positioning, perineal massage, aromatherapy, and hand pressure on labor

To emphasize epidural practices and the conditions required for achieving a birth without suturing

To discuss the effectiveness of the midwife in labor monitoring and the characteristics of the birth team

To discuss the optimal timing of epidural and the ideal technique for epidural injection

To scientifically compare conventional and water birth approaches and emphasize the advantages and disadvantages of water birth

To learn appropriate candidate selection, process management, preparation of the birth environment, and management of potential complications in water birth

To aim to incorporate water birth into clinical practice through hands-on training at the bedside

Moderator: Özgür Özgür Panelists: Flaminia Sotgiu, Selim Çelbi, Hüsnühan Çimen, Talca Aytemir Kılıçcıoğlu</p> <p>Topics for Discussion:</p> <ul style="list-style-type: none"> • Interactions Between Functional Gynecology and Cosmetic Procedures • Current Practices: Which Procedures Have Become Routine, and Which Remain Controversial? • Patient Expectations, Satisfaction, and the Psychosocial Dimension • Current Status of Energy-Based Technologies: Risks and Regenerative Therapies • Ethical Boundaries and Professional Responsibilities: Standards, Certifications, and Training Needs • Future Trends and Technological Developments in Cosmetic Gynecology 	<p>16:30-17:30</p> <p>Panel: Prevention of Preterm Birth: Progesterone, Cerclage, Tocolytics Moderator: Racey Ras Panelists: Tuzaş Bekar, Serkan Özyü, David Çelik, Özgür Özköler</p> <p>Topics for Discussion:</p> <ul style="list-style-type: none"> • Current Approaches to Predicting the Risk of Preterm Birth • Indications for Cerclage • Post-Cerclage Follow-Up, Complications, and Causes of Failure • The Role, Efficacy, and Safety of Tocolytic Agents: Who, When, and How Much? • Timing of Antepartum Corticosteroids and Magnesium Sulfate Administration in the Context of Tocolysis • Optimal Approaches in Different Clinical Scenarios (Multiple Pregnancy, Preterm Preterm Birth, Short Cervix) • Controversial Areas in Light of Current Guidelines and Practical Management Encountered in Clinical Practice 	<p>16:30-17:30</p> <p>Panel: Adrenal Masses Through Case Studies Moderator: Recep Ali Bekar Panelists: İsmail Özyü, Kemal Çelbi, Özgür Özköler, Mehmet Saltık Bekar</p> <p>Topics for Discussion:</p> <ul style="list-style-type: none"> • Initial Evaluation and Risk Stratification of Adrenal Masses • Case-Based Use of IOTA Simple Rules, ADOX, and O-RADS • Classification • The Role of Tumor Markers (CA-125, HE4, etc.) in Diagnostic and Clinical Decision-Making • Minimally Invasive Surgery or Laparotomy? Case-Based Selection of the Surgical Approach • Indications for Staging Surgery in Suspected Adrenal Masses • Minimally Invasive Surgery or Laparotomy? Case-Based Selection of the Surgical Approach • Management Strategies in Cases Initially Considered Benign but Ultimately Diagnosed as Malignant 	<p>16:30-17:30</p> <p>Panel: Who Should Receive MHT? How Should It Be Used? For How Long? Moderator: Alihan Özköler Panelists: Alihan Özköler, İsmail Çelbi, Özgür Özköler, Serkan Özyü</p> <p>Topics for Discussion:</p> <ul style="list-style-type: none"> • Menopause: Who Should Receive MHT? How Should MHT Be Prescribed? For How Long? • Timing of Initiation: The "Window of Opportunity" Concept • Types and Regimes of Estrogen: Oral vs. Transdermal • Progestogen Selection: For Whom, Which One, and for How Long? • MHT in the Context of Cardiovascular, Thrombotic, and Breast Cancer Risks • Duration of MHT: Criteria for Continuation and Discontinuation 	<p>16:30-17:30</p> <p>Panel: The Difficult IFF Patient: When to Persist, When to Change Strategy? Moderator: Gökhan Beşoğlu Panelists: Erhan Sımpık, Çiğdem Naimiçoğlu, Talca Aytemir Kılıçcıoğlu</p> <p>Topics for Discussion:</p> <ul style="list-style-type: none"> • IFF: What Should the Change in the Protocol? • Unexpected Poor Ovarian Response: Where Was the Pitfall in the First Cycle? • PFS-4: When is it Beneficial, and When is it Unnecessary? • Ovarian Factors and Evaluation Strategies in Recurrent Implantation Failure • When Should We Say "Stop"? • Ethical Boundaries and Realistic Expectation Management 	<p>16:30-17:30</p> <p>Panel: Do Sling Surgery Techniques Really Make a Difference? (Part 2) Moderator: Pınar Topaloğlu Yılmaz Panelists: Fatih Bayraktar, Berya Kılıç Özkavut, Bekir Akay, Cemal Nur Çelbi</p> <p>Topics for Discussion:</p> <ul style="list-style-type: none"> • The Role and Current Indications of Sling Surgeries in Stress Urinary Incontinence • Impact of Technical Variations on Success Rate and Patient Satisfaction • Complication Profiles: Pain, Mesh Erosion, Voiding Dysfunction • Patient Selection: Primary vs. Recurrent Cases, Concurrent Pelvic Organ Prolapse • Surgeon Experience and the Learning Curve in Sling Procedures • Revision and Alternative Treatment Options After Failed Sling Surgery • In Light of Current Guidelines: Does Technique or Patient Selection Determine the Outcome?
<p>17:30-18:30</p> <p>LIVE DEMO Moderator: Çağrı Akay</p> <p>Public Academy - Retroperitoneal Dissection - Hysterectomy Surgeon: Sahit Toprak (Live Transmission From Akdeniz University Hospital)</p> <p>Hysteroscopic Myomectomy Surgeon: Erhan Sımpık (Live Transmission From Akdeniz University Hospital)</p> <p>Hysteroscopic Scar Repair Surgeon: Selen Duman (Live Transmission From Akdeniz University Hospital)</p> <p>WORLDWIDE CONGRESS</p>					

KSDF 2026

2nd WOMEN'S HEALTH SOCIETIES FEDERATION CONGRESS

APRIL 22-26, 2026 Rixos Sungate, Antalya

APRIL 24, 2026, FRIDAY

HALL A 08:30-10:00 With Respect to Those Who Inspire and Lead The Way Prof. Dr. Erilgen Erilgenoglu Session Session Chair: Fatih Durmuşoğlu, Gülte Aydin What does Back Box say? Fatih Durmuşoğlu Premature Ovarian Insufficiency: Fertility and Beyond, a Comprehensive Challenge in Women's Health Azrahan Çelebi WPS and Deep Disorders Hakan Saygılıoğlu Postmenopausal Osteoporosis and Muscle Joint Pains Serdar Özayman Discussion	HALL B 08:30-10:00 With Respect to Those Who Inspire and Lead The Way Prof. Dr. İhsan Hekim Session Session Chair: Talay Kumruoğlu, Ulca Coban Non-Neck Pelvic Repair Azrahan Khande Mesh-Free Incontinence Surgery: ULP Procedure Ahan Sivasoglu Laparoscopic Interventions for Pelvic Floor Disorders Talay Kumruoğlu Sexual Function and Incontinence Azrahan Khande Partial Colposcopy Technique Talay Turan İhan Discussion	HALL C 08:30-10:00 Interactive Case Discussion Topic: Irregular Bleeding Case Presentation: Ayşe Gül İsmail Moderator: H. C. Tamer Discussion: Anam Özgünoğlu, Ahsan Turker, Neşe Yılmaz • Ovarian Dysfunction • Adenomyosis In this session, two cases presented by a young gynecologist will be discussed interactively with contributions from senior professors. Diagnostic approaches, treatment options, and clinical decision-making processes will be evaluated in light of current knowledge.	HALL D 08:30-10:00 Endoscopic Surgical Case Discussions with Visual Presentations Session Chair: Gürkan Özcan Faculty: Procedure: Laparoscopic Cystocele Bülent Akhan Procedure: Laparoscopic Lateral Suspension Çengiz Şenel Procedure: Laparoscopic Hysterectomy in Difficult Cases Enanb Töz	HALL E 08:30-10:00 Industry Sponsored Course - Hysteroscopy  Faculty: Ertan Özgür Leyla Koculu Ahmed Kaplan Ahmed Özkan Serhat Ege	HALL F 08:30-10:00 Oral Presentation Session Session Chair: Özcan Akbulut, Şiirhan Eray
--	---	---	--	---	--

10:00-10:40 **SATELLITE SYMPOSIUM**
HPV, HPV-Related Diseases, and HPV Vaccines in the Prevention of Cancer
Session: Capacity Topics

10:40-11:30 **COFFEE BREAK (MEET THE INDUSTRY)**

11:30-12:00 **SATELLITE SYMPOSIUM**
Continuous Support from Preconception to Breastfeeding: Begonimix Plus Plus
Proctor: Recep Arç
Session: Power Topics

12:00-13:00 Should We Screen for Rare Autosomal Trisomies, Microdeletions, and Duplications with NPT? Proctor: Ayşe Ay 12:00-12:20 PhD: Ebru Demirelioğlu 12:20-12:40 Case: Özlem Fato 12:40-13:00 Discussion	12:00-13:00 Pro Case: Gynecological Oncology HPV in the Management of Advanced Epithelial Ovarian Cancer Moderator: Serhat Toprak 12:00-12:20 PhD: Celal Toprak 12:20-12:40 Case: Christiane Fotopoulou 12:40-13:00 Discussion	12:00-13:00 Meeting with the Mentor Interesting Cases in Urogynecology: Elusive Incontinence (Obstructed Detrusor) Complications of Incontinence Surgery Azrahan Khande How to Select the Right Surgery for Each Pelvic Problem Tamara Simoniaci Sexual Medicine - A Personal Journey Anamora Özgür MHT & the Cardiovascular Spectrum. Azrahan Khande	12:00-13:00 Endoscopic Surgical Case Discussions with Visual Presentations Session Chair: Page Uluç Faculty: Procedure: Laparoscopic Adrenal Mass Management Serdar Güneş Özkulu Procedure: Laparoscopic Sacrospinoplasty Harun Dural Procedure: Laparoscopic Urogynecologic Surgeries Hamid Akil Güler	12:00-13:00 KSDF Academy: Bring Your Idea, Let's Discuss! Discussion: Talay Kumruoğlu, İhsan Dündar, Ahan Sivasoglu	12:00-13:00 Oral Presentation Session Session Chair: Güle Yıldız, Seline Özcağı
---	--	--	--	--	--

13:00-14:00 **LUNCH BREAK**

14:00-15:30 Inferior Session Session Chair: Davut Özcan, Mete İyigözü Challenges and Innovations in Imaging Superficial Endometriosis İyigözü Mete Performance of the Ultrasound-Based Endometriosis Staging System (UESS) in Predicting the Utility Level of Laparoscopic Endometriosis Surgery Bülent Özcan What is the Natural Course of Endometriosis and Endometriomas: Should We Monitor Them with Ultrasound? Yavuz Emre Şişir Incidental Ultrasound Findings of Adenomyosis: How Should We Inform Our Patients? Ayşe Şişir Ate Discussion	14:00-15:30 With Respect to Those Who Inspire and Lead The Way Prof. Dr. H. Ferit Özgür Session Session Chair: H. Ferit Özgür, Emine Karahök Are There Any Changes in the Epidemiology of HPV-Related Diseases? Hamid Akil Güler What is the Optimal Cervical Cancer Screening Strategy? Talay İhan What are the Criteria for Colposcopic Evaluation? Mujat Uygul What are the Medical Treatment Options for Cervical Preinvasive Lesions? İhsan Ferit Özgür Discussion	14:00-15:30 Interactive Case Discussion Topic: Endometriosis Case Presentation: Serhat Akbay Moderator: Ferhat Akbay Discussion: Anam Akbay Toprak, Halim Toprak, Serhat Akbay, Serhat Akbay • Adenomyosis • Uterine Septum In this session, two cases presented by a young gynecologist will be discussed interactively with contributions from senior professors. Diagnostic approaches, treatment options, and clinical decision-making processes will be evaluated in light of current knowledge.	14:00-15:30 Endoscopic Surgical Case Discussions with Visual Presentations Session Chair: Erhan Şenel Faculty: Procedure: Complex Laparoscopic Hysterectomy Cases and Laparoscopic Approach in Pelvic Pain Anomalies Ömer Toprak Procedure: Laparoscopic Myomectomy Recep Ertan Procedure: Hysteroscopic Fertility Surgeries Ramazan Erhan Fırat	14:00-15:30 Next Generation Session The New-Generation Woman, New-Generation Gynecology: The Impact of Quality, Medications, and Modern Life on Women's Health The World is Changing Rapidly—But Are We Ready? Session Chair: Bahadır Akdeniz, Gürkan Özcan Obesity ve Yeni Nesil Patolojiler (DLP-1 Analojisi) Ayhan Toprak Modern Yaşamın Gelişimi (DLP-1 Analojisi) Recep Ertan Modern Kadın ve Modern Hastalıklar: Modern Yaşamın Sessiz Pandemisi: Stres, İlaçların ve Hormonların Etkisi Fatih Güler Longevity ve Kadın Sağlığı: Kadın Sağlığında Bilişimsel ve Yaşamın Yeni Nesil Sorunları Serhat Akbay	14:00-15:30 Gynecologic Endoscopic Surgery Video Presentations Session Chair: M. Ferit Özgür, Emine Karahök
--	--	--	---	--	--

15:30-16:30 **COFFEE BREAK (MEET THE INDUSTRY)**

16:30-18:30 **SATELLITE SYMPOSIUM**
Precision Energy in Gynecology: Clinical Evidence and Applications of Ligasure IP
Moderator: Ramazan Kemal Akbay
Speaker: Anam Akbay Karaman

16:30-17:30 Panell: Endometriosis - New Approaches in the Management of Endometriomas Moderator: Çiğdem Özgür Panelists: Yavuz Emre Şişir, Güle Yıldız, Davut Özcan, Ahmet Demirci, Lütfi Çelebi Topics for Discussion: <ul style="list-style-type: none"> • Diagnostic Approach to Endometriomas: Ultrasound, MRI, and Follow-Up Strategies • Risk and Size or Intervention? Which Patient, and When? • Surgical Indications: Risk, Inertility, Suspicion of Malignancy • Impact of Endometrioma Surgery on Ovarian Reserve and Protective Strategies • Comparison of Cystectomy, Ablation, Sclerotherapy, and Combined Techniques • Surgery First or HT in Patients Desiring Fertility? • Risk of Recurrence and Long-Term Management Strategies 	16:30-17:30 Panell: Sexual Dysfunction - Why Am I Unable to Achieve Orgasm? Moderator: Zülal Akil Güler Panelists: Anamora Özgür, Seline Bahadır, Ali Doğanlar Arçan Topics for Discussion: <ul style="list-style-type: none"> • Definition and Classification of Female Organic Disorder • The Role of Anatomical, Neurological, and Hormonal Factors • Psychological Factors: Anxiety, Depression, Trauma, and Relationship Dynamics • Pelvic Floor Dysfunction and its Relationship with Orgasm • Partner Involvement and Couple-Centered Approaches • Cultural, Social, and Communication Barriers • Real-Life Case Examples 	16:30-17:30 Panell: How is Emerging Subspecialty Changing the Field? Moderator: Mete İyigözü Panelists: H. Ferit Özgür, Ferhat Demirci, Fatih Kızı, H. Ali Karim, İhsan Coban Topics for Discussion: <ul style="list-style-type: none"> • Definition, Scope, and Multidisciplinary Nature of Oncofertility • Early Assessment of the Need for Fertility Preservation in Reproductive-Age Patients: Diagnosed with Cancer • Oocyte, Embryo, and Ovarian Tissue Cryopreservation: Indications and Timing • Current Limits of Fertility-Sparing Surgery in Gynecologic Cancers • Ethical, Legal, and Informed Consent Processes in Oncofertility • Prognosis, Survival, and Long-Term Reproductive Outcomes • The Potential for Oncofertility to Become an Integral Part of Standard Care in the Future 	16:30-17:30 Panell: Imaging - Optimizing Accurate Diagnosis and Surgical Management of Endometriosis and Adenomyosis Moderator: Bülent Özcan Panelists: Ayşe Şişir Ate, Hilal Şahin, Cem Demirelioğlu Topics for Discussion: <ul style="list-style-type: none"> • Transvaginal Ultrasound and MRI: When, Which Modality, and for What? • Imaging Criteria and Classification of Deep Infiltrating Endometriosis • Ultrasonographic Diagnosis: Criteria and Differential Diagnosis of Adenomyosis • Contribution of Imaging Findings to Surgical Planning • Preoperative Lesion Mapping and a Multidisciplinary Approach • Optimization of Diagnostic and Surgical Strategies in Light of Current Guidelines 	16:30-17:30 Panell: Endoscopy - Is Robotic Surgery Necessary? Moderator: Saliha Toprak Panelists: Ahmet Özçimen, Zülal Ferit Çiğdem, Ali Kılıçkiran Topics for Discussion: <ul style="list-style-type: none"> • Comparative Advantages and Limitations of Robotic Surgery Versus Laparoscopy • Imaging Criteria and Classification of Deep Infiltrating Endometriosis • In Which Gynecologic Cases Does Robotic Surgery Truly Make a Difference? • The Role of the Robotic Approach in Diagnostic, Benign, and Complex Surgeries • Evidence-Based Data on Complication Rates and Patient Outcomes • Cost-Effectiveness and Sustainability from a Healthcare System Perspective • The Future of Robotic Surgery: Artificial Intelligence, Image Integration, and New Platforms • When is Robotic Surgery Necessary, and When is it Unnecessary? 	16:30-17:30 Panell: Inertility - Primary Care Inertility Management Moderator: Ferhat Akbay Panelists: Güneş Bozdoğan, Güle Yıldız, Bülent Yılmaz, Serhat Çelebi, Serhat Akbay Topics for Discussion: <ul style="list-style-type: none"> • What Should be Included in the Initial Workup? • Should HSG Be Performed for Everyone? • Which Patients Have Ovarian Reserve Parkers or Age? • Is Ovarian Treatment a Waste of Time? • Is IUI a Treatment Option? • Why Consider Alternatives When IVF is Available? • Where Does Surgery Fit In?
--	--	--	--	---	--

17:30-18:30 **LIVE SURGERY**
Moderators: Gürkan Özcan, İhsan Koculu
Laparoscopic Myomectomy
Surgeon: Bülent Akil Güler (Live Transmission From India)
Laparoscopic Endometriosis Surgery
Surgeon: Ertan Arç (Live Transmission From Bursa İhsan University Hospital)

KSDF 2026

2nd WOMEN'S HEALTH SOCIETIES FEDERATION CONGRESS

APRIL 22-26, 2026 Rixos Sungate, Antalya

APRIL 25, 2026, SATURDAY

HALL A 08:30-10:00 With Respect to Those Who Inspire and Lead The Way Prof. Dr. Ahmet Zeki İpek Endometriosis Session Endometriosis and Infertility Session Chair: Ermen Berkay, Özgür Kalkan <p>Surgey Remains an Appropriate Option in the Treatment of Endometriosis-Associated Infertility When Performed Properly Mehmet Akar</p> <p>Delayed Endrya Cryopreservation Prior to Surgery Ermen Berkay</p> <p>Management Strategies in the Presence of Concurrent Adenomyosis Ladivke Nihal</p> <p>Does Surgery for Deep Endometriosis Improve Fertility? Özgür Kalkan</p> <p>Discussion</p>	HALL B 08:30-10:00 With Respect to Those Who Inspire and Lead The Way Prof. Dr. Feriye Güngör Session Session Chair: Murat Sözlümaz, Burakın Palat <p>Fertility Preservation Approaches in Patients with Cancer Emel Canca</p> <p>Oocyte, Sperm, and Ovarian Tissue Cryopreservation in Cancer Patients İşıl Kaşapoğlu</p> <p>Ovarian Stimulation Protocols in Patients with Cancer Hilaf Karayaylı Öner</p> <p>Ovarian Transplantation Murat Sözlümaz</p> <p>Discussion</p>	HALL C 08:30-10:00 Interactive Case Discussion <p>Topic: Infertility Case Presentation: Emre Naci Dökür Moderator: Cemal Pınar Discussions: Funda Güllü, Neviz Tokgöç, Gülşen Öner, İsmet Güle</p> <ul style="list-style-type: none"> • Infertility in Patients with Endometriosis • Infertility in Patients with PCOS <p>In this session, two cases presented by a young gynecologist will be discussed interactively with contributions from senior professors. Diagnostic approaches, treatment options, and clinical decision-making processes will be evaluated in light of current knowledge.</p>	HALL D 08:30-10:00 Endoscopic Surgical Case Discussions with Visual Presentations Session Chair: Alihan Etiler Kemner <p>Faculty: Procedure Laparoscopic LUP Alihan Etiler Procedure Laparoscopic Hysterectomy Süleyman Çelimen Procedure Laparoscopic Myomectomy Selen Doğan</p>	HALL E 08:30-10:00 Industry-Supported Course: System Training Course Director: Dr. Murat Nihal <p>Faculty: Doan Faziletin Kaşık Ömer Uğur Şenay Gülşen Feyhan Feyhan Zahide Feriye Çiğdem Özhan Özkan Ayşenur Yapar Dr. Ali Nihal Münevver Güneş</p>	HALL F 08:30-10:00 Oral Presentation Session Session Chair: Murat Güllüoğlu, Ash Adilov
---	--	--	---	--	--

10:00-10:40

SATELLITE SYMPOSIUM
Different Functions, Common Goal: Optimal Outcomes with Integrated Systems
Topic: Surgical Energy Modalities: Optimal Tissue Management with Bipolar Technology
Speaker: Talup Kuntay

Applied Medical

Device Compatibility in hVTEES Surgery
Speaker: Kemal Güllüoğlu

10:40-10:55

COFFEE BREAK (MEET THE INDUSTRY)

10:55-12:00

SATELLITE SYMPOSIUM
The Role of Cervix in Cervical Regeneration and Inflammation Management
Topic: Cervix
Speaker: Zehra Feriye Çiğdem

Orthogen

12:00-13:00 With Respect to Those Who Inspire and Lead The Way Prof. Dr. Azar Kay Session Should Secondary Thromboprophylaxis Be Screened for in Recurrent Pregnancy Loss, and Should Prophylaxis with Low-Molecular-Weight Heparin Be Used? Topic: Recurrent Pregnancy Loss <p>12:00-12:05 Prs: Cem Seymen</p> <p>12:00-12:40 Case: Sibel Çelikkaya Demir</p> <p>12:40-13:00 Discussion</p>	12:00-13:00 Prs Case: Endometriosis and Infertility Topic: Endometriosis <p>12:00-12:05 Prs: Removal of the Mechanical Obstruction Through Tertiary-Level Surgery Mehmet Akar</p> <p>12:00-12:40 Case: Damage to Ovarian Reserve, Treatment Delay, and Direct Implementation of IVF Neviz Tokgöç</p> <p>12:40-13:00 Discussion</p>	12:00-13:00 Meeting with the Mentor Topic: Endometriosis <p>Considering a Career in the UK as an Obstetrician and Gynaecologist Ali Güllüoğlu</p> <p>Optimizing Uterine Management in the Context of Contrary Diagnostic Criteria by USMR, CTSE, AGSM and CPMG Artur Ludwin</p> <p>Patient Friendly Ovarian Stimulation Protocols Domènec Sempere</p> <p>Optimizing Tubal Patency Testing: Tips, Tricks, and Pitfalls İşıl Kaşapoğlu</p> <p>Real Growth Domènec Sempere</p>	12:00-13:00 Endoscopic Surgical Case Discussions with Visual Presentations Session Chair: Alihan Etiler <p>Faculty: Procedure: Özetken Modifikasyon Kemal Özerkan</p> <p>Procedure: Key Points in Laparoscopic Sentinel Lymph Node Dissection Seda Vildan Özbek</p> <p>Procedure: Laparoscopic Hysterectomy in Difficult Cases Münevver Güneş</p>	12:00-13:00 Nursing Session Session Chair: Can Beşikçi, Sevil Bebir Talak <p>The Role of Nurses in ART Centers Tilay Karayaylı</p> <p>Current Challenges in ART Nursing Practice Seda Sevil</p> <p>Teamwork in Endoscopic Surgery Fatma Gülşah Çaylak</p> <p>Quality, Safety, and Patient-Centered Care in Clinical Nursing Tilay Çelik</p> <p>Discussion</p>	12:00-13:00 Oral Presentation Session Session Chair: Ergül Çenes Bulut Akar, Anil Erkin
--	--	--	--	---	--

13:00-14:00

COFFEE BREAK (MEET THE INDUSTRY)

14:00-15:00 With Respect to Those Who Inspire and Lead The Way Prof. Dr. Bilal Ermen Session IVF, ET Session Chair: Ahmet Zeki İpek <p>The Efficacy of Ovarian Stimulation Real World Evidence Domènec Sempere</p> <p>Endometriosis, Endrya and Biopsy: What Truly Matters in IVF? Bery Ayte</p> <p>Treatment of IVF: Are We Doing Too Much? Domènec Sempere</p> <p>Simplification of IVF Gülşen Öner</p> <p>Discussion</p>	14:00-15:00 Session on Sexuality in Adolescence and Preventive Approaches Session Chair: Nefise Karayaylı, Ayşe Başbuğ <p>Sexuality in Adolescence and Preventive Approaches Özlem Durak</p> <p>Normal Pubertal Development and the Approach to Pubertal Disorders Özlem Durak</p> <p>Diagnosis of PCOS in Adolescents, Pubertal Problems, and Symptom Management Nefise Karayaylı Nihal</p> <p>Approach to and Management of Pituitary Anomalies in Adolescents Alihan Etiler</p> <p>Discussion</p>	14:00-15:00 Interactive Case Discussion <p>Topic: Reproductive Endocrinology Case Presentation: Emre Naci Dökür Moderator: Yalçın Nihal Discussions: Ash Adilov, Emre Naci Dökür, Funda Çelikkaya, Ayşe Başbuğ</p> <ul style="list-style-type: none"> • Live with a Single Oocyte in a Patient with Diminished Ovarian Reserve: An IVF Case • Hypo-Ovulation and Low Ovarian Reserve: The Path to Pregnancy in a Challenging Case <p>In this session, two cases presented by a young gynecologist will be discussed interactively with contributions from senior professors. Diagnostic approaches, treatment options, and clinical decision-making processes will be evaluated in light of current knowledge.</p>	14:00-15:00 Endoscopic Surgical Case Discussions with Visual Presentations Session Chair: Alihan Etiler <p>Faculty: Procedure: Laparoscopic Adenomyosis Surgery Münevver Güneş</p> <p>Procedure: Intraoperative Fluorescence Uterine Imaging with Indocyanine Green in Robotic Cervical Hysterectomy and Surgical Stages: A Case of Viscerovaginal Adhesion Following Cesarean Section Zehra Feriye Çiğdem</p> <p>Procedure: Laparoscopic Resection Hayal Çelimen</p>	14:00-15:00 The Physician's New Assistant: Thinking with Artificial Intelligence in Obstetrics and Gynecology Practice Session Chair: Alihan Etiler <p>White Reading, Writing, and Making Decisions... Where Should We Draw the Line and How Should We Use It? Emre Nihal</p> <p>Generative Artificial Intelligence and Prompt Engineering in Medicine Seyma Haskaylı Çelik</p> <p>Artificial Intelligence in the Evaluation of Complex Patients: A Real-World Clinical Illustration of a Digital Consultant? Sevil Bebir Talak</p> <p>Does Artificial Intelligence Strengthen or Weaken Literature Literacy While Reading Scientific Articles? Ahmet Özerkan</p> <p>The Limits of Academic Production with Artificial Intelligence: From Statistics to Neurosurgery Writing Emre Nihal</p> <p>Discussion</p>	14:00-15:00 Obstetric Ultrasonography Oral Presentation Session Session Chair: Sevil Bebir Talak, Tansu Bahar Güllüoğlu
---	--	---	--	--	--

15:00-15:15

COFFEE BREAK (MEET THE INDUSTRY)

15:15-16:30

SATELLITE SYMPOSIUM
New Generation Solution in Iron Deficiency - Fertimid
Topic: Iron Deficiency
Speaker: Ayşe Başbuğ

TABILAC

16:30-17:30 Panel: Contraception - Which Method for Whom? Topic: Contraception <p>Panelists: Sevil Bebir Talak, Pinar Çelikkaya, Ayşe Başbuğ, Levent Kaşık, Münevver Güneş, İsmet Güle</p> <p>Topics for Discussion: <ul style="list-style-type: none"> • Pre-Treatment Assessment of Patients Prior to Hormonal Contraception • Contraceptive Choice in the Presence of Systemic Diseases (According to WHO Criteria) • Recent Advances in Oral Hormonal Contraception • Comparison of Hormonal, Non-Hormonal, and Long-Acting Reversible Contraception (LARCs) Methods • Contraception in Adolescents and Multiparous Women • The Role of Emergency Contraception and Current Practices • Clinical Outcomes in Light of Current Guidelines </p>	16:30-17:30 Panel: Panel: A Holistic Approach in Gynecology and Obstetrics - What Do We Need to Know? Topic: Holistic Approach <p>Panelists: Mehmet Akar, İsmet Güle, Zehra Feriye Çiğdem, Şahin Bulut</p> <p>Topics for Discussion: <ul style="list-style-type: none"> • Definition and Importance of a Holistic Approach in Gynecology and Obstetrics • Impact of Nutrition, Lifestyle, and Mental Health on Gynecologic and Obstetric Outcomes • Complementary and Alternative Approaches: Evidence or Expectation? • What is the Actual Benefit for Reproductive Outcomes? • How Does it Influence Inflammation? • Impact on Patients with Endometriosis • The Future Role and Limitations of Holistic Approaches </p>	16:30-17:30 With Respect to Those Who Inspire and Lead The Way Prof. Dr. Seda Karayaylı Panel What Has Changed in PCOS? Topic: PCOS <p>Panelists: Sevil Bebir Talak, Nefise Karayaylı Nihal, Nefise Karayaylı, Ayşe Başbuğ, Emre Nihal</p> <p>Topics for Discussion: <ul style="list-style-type: none"> • Current Status in Pathogenic Mechanisms: How Far Have We Come? • An Individual Condition or an Intergenerational Transmitted Legacy? • Pathologic Role: Whom, When, and How Should We Monitor? • Infertility Management: Where is the Current Evidence Taking Us? • Phenotype-Based Approach: How Does it Influence Clinical Management? • The Expanding Role of Lifestyle in Ovulation Induction and Current Evidence • PCOS in Adolescents: Diagnostic Challenges and the Problem of Overdiagnosis </p>	16:30-17:30 Panel: Prevention of Gynecologic Cancers: What Are the Key Points in the Cytological and Histopathological Management of Cervical Preneoplastic Diseases? Topic: Cervical Cancer <p>Panelists: Alihan Etiler, Selen Doğan, Gülşen Öner, Doğan Yılmaz</p> <p>Topics for Discussion: <ul style="list-style-type: none"> • Utilizing HPV Testing and Co-Testing Approaches in Cervical Cancer Screening • Clinical Interpretation of Abnormal Cytology Results (ASC-US, LSIL, HSIL, etc.) • Risk-Based Management and Follow-Up Algorithms in HPV-Positive Patients • Indications for Colposcopy, Biopsy Strategies, and Adequacy Criteria • Indications and Limitations of Excisional and Ablative Treatment Modalities • Post-Treatment Follow-Up and Management of Recurrence Risk • Common Pitfalls in Clinical Practice in Light of Current Guidelines </p>	16:30-17:30 Panel: Infertility: Has Ovulation Induction Been Standardized? Topic: Infertility <p>Panelists: Alihan Etiler, Selen Doğan, Gülşen Öner, Doğan Yılmaz</p> <p>Topics for Discussion: <ul style="list-style-type: none"> • Current Guidelines and Recommended Standards in Ovulation Induction • Determinants of Success in Ovulation Induction • Ovulation Induction Agents Used in IVF, Embryo, Donor, and Surrogacy (Gonadotropin) • Do Current Guidelines in IVF and Controlled Ovarian Hyperstimulation (COH) Truly Establish Standards? • Selection of COH Protocols Based on Patient Phenotype/PCOS (Diminished Ovarian Reserve, Advanced Maternal Age) • Is LH Supplementation Necessary, and in Which Patients? • Triggering Strategies: ICSI, GnRH Agonist, or Dual Trigger </p>	16:30-17:30 Panel: Controversial Topics in Reproductive Surgery Topic: Reproductive Surgery <p>Panelists: Sevil Bebir Talak, Abdullah Karayaylı, İsmet Güle, Alihan Etiler</p> <p>Topics for Discussion: <ul style="list-style-type: none"> • The Current Role of Reproductive Surgery in Infertility Treatment • Management of Hydrosalpinx • Septum Resection: For Whom and When is it Truly Beneficial? • Intrauterine Devices: Defining the Limits of Surgical Indications • Dysmorphic Uterus • The Relationship Between Endometriosis and Infertility • Laparoscopic Carcinoma: Who Benefits and When? </p>
--	---	--	--	---	--

17:30-18:30

LIVE SURGERY
Moderators: Feriye Güngör, Alihan Etiler Kemner
Laparoscopic: Sibel Çelikkaya
Surgeon: Talup Kuntay (Sakarya University Hospital)

hVTEES Hysterectomy
Surgeon: Kemal Güllüoğlu (Sakarya University Hospital)

Applied Medical

KSDF 2026

2nd WOMEN'S HEALTH SOCIETIES
FEDERATION CONGRESS

APRIL 22-26, 2026
Rixos Sungate, Antalya

APRIL 26, 2026, SUNDAY

HALL A

08:30-10:00

Sexual Dysfunction Session: When Sex Hurts
Session Chairs: **Selcen Bahadır, Telise Ayten Küçükcem**

Female Sexual Pain Disorders According to Clinical Guidelines
Annemaria Giraldi

Painful Intercourse from a Sexual Medicine Perspective
Selcen Bahadır

A Holistic Approach to Vaginismus
Zihne Dilek Şenil

Regenerative Approaches in Sexual Pain Disorders
Ali Doğan Anjan

Discussion

10:00-10:45

Rational Drug Use
Bahadır Kaşan

HALL B

08:30-09:15

Contraception Session
Session Chairs: **Yaprak Üstün, Selin Özaltın**

Making the Right Choice in Combined Oral Contraceptive Selection
Şebnem Alanya Tosun

Use of Progestin-Only Pills and Intrauterine Devices
Nefise Tamdan Okçu

Hormonal Contraceptives and Their Association with Malignancy
Emre Yılmaz

Use of Contraceptive Implants
Nefise Nazlı Yenigül

Discussion
